

GEN3SIS SOLUTIONS

Digital Workplace, Operations & User Experience

WorkG360

What is WorkG360?

WorkG360 is Gen3sis' solution for designing, operating, and optimizing the Digital Workplace, integrating technology, security, and support to ensure a productive, secure, and continuous work experience.

Enables modern work environments—whether on-site, remote, or hybrid—by ensuring technology adoption, operational efficiency, and end-user satisfaction.

The problem it solves

Many organizations have collaboration and productivity tools, **but they face fragmented environments, operational overload for IT, security risks, and a poor user experience.**

WorkG360 integrates implementation, operation, and user experience into a single solution.

What does the solution include?

- Implementation and standardization of the Digital Workplace
- Continuous management of users, devices, and licenses
- Integrated workplace safety
- Intelligent support and self-service for users
- Continuous optimization of costs, adoption, and experience

Key benefits

- Increased end-user productivity
- Operational efficiency of the IT department
- Safe and reliable work environments
- Improved employee experience
- Optimization of technology costs

Next step

Is your organization ready to offer a secure, efficient, and people-centered digital work experience?

Let's talk and design together the **Digital Workplace** your team needs.
